PROFILE SUMMERY

A responsible, self motivated Software Engineering enthusiast with solid leadership qualities and a strong team spirit. Passionate about taking on new challenges and applying creative thinking. Seeking an opportunity as a Software Engineer to apply skills, adapt to new technologies, and make valuable contributions to the IT industry.

WORK EXPERIENCE

Software Engineer Intern

Feb 2025 - Aug 2025

Keen Rabbits PVT LTD,Gampaha

Developed full-stack web applications using Laravel, React.js, Node.js, and MySQL in an Agile/Scrum environment. Built RESTful APIs, managed databases, performed Manual QA Testing, fixed bugs and maintained version control via Git. Coordinated project tasks, managed hosting services, and collaborated with cross-functional teams across the SDLC.

Web Developer Intern

Sep 2024 - Dec 2024

IT Signature,Colombo

Developed full-stack web applications using PHP and MySQL in an Agile environment, including ongoing LMS and Digital Online Class System projects. Built and maintained dynamic front-end interfaces using modern web technologies, and managed source code versioning via Git.

EDUCATION

International College of Business & Technology ,Colombo (Cardiff Metropolitan University, UK)

March 2023 - May 2026

Bsc.(Hons) in Software Engineering

- 2.1 Secound Class Upper Division

Higher Diploma in Computing Software Engineering

- Grade : Merit
-

PROJECT

LogiTrack - Warehouse Time Tracker System

Apr 2026 - PRESENT

- Developed a real-world warehouse management system with document tracking, SAP unique numbers integration, real-time update, issue-print processing, delivery verification, and logistics workflow automation using React.js, Spring Boot, and MySQL. [[Github](#)]
- **Tech Stack** : React.JS, Spring Boot, Node.JS, Tailwind CSS, and MYSQL.

Climate Risk Migration Analysis and AI Adviser

Mar 2026 - PRESENT

- Developed a self-study Travel Planner application integrating real-time weather data and travel advisories via REST API aggregation. Implemented user authentication, dynamic data fetching, and persistent storage using Firebase Realtime Database, delivering a responsive and data-driven travel planning experience. [[Github](#)]
- **Tech Stack** : Next.JS, Tailwind CSS, Firebase (BaaS), OpenWeatherMap API.

AI-Powered Event Budget Predictor With Cost Optimization System

Sep 2026 - Mar 2026

- Developed an individual final-year project an EventSense AI-powered intelligent event management solution for budget forecasting and cost optimization, enabling data-driven planning decisions by designing and implementing an end-to-end ML pipeline with Machine Learning predictive models integrated via RESTful APIs. [\[Github\]](#)
- Tech Stack** : TypeScript.Js, Express.Js, Node.Js, Python, ML ,Tailwind.CSS and MongoDB

Car Crash Severity Predictions System

Dec 2026 - Jan 2026

- Developed a machine learning-based system to predict vehicle crash severity using historical accident data, applying data preprocessing and predictive modeling techniques to generate accurate risk classifications and support data-driven safety decision-making. [\[Github\]](#).
- Tech Stack** : HTML, CSS, Python, ML and FLASK API

PahanEdu - Customer Relationships Management System

Jun 2025 - Aug 2025

- Developed a Bookshop Billing & CRM System (PahanaEdu) featuring role-based access control (RBAC) for Admin and Cashier users. Implemented customer bill generation, user and item management, duplicate entry validation, HttpSession-based authentication, JavaMail API email integration, and dependency management via Maven. [\[Github\]](#).
- Tech Stack** : Java ,Java Servlets, MySQL , Apache Tomcat

VasityLodge - Hotel Room Booking System

Nov 2024 - Feb 2025

- Engineered a second-year HD final group project a full-stack Hotel Room Reservation System featuring room availability checks, Email OTP authentication, booking verification, facility-based search, cost calculation, payment gateway integration, and meal selection. [\[Github\]](#).
- Tech Stack** : PHP, HTML5, CSS3, JavaScript, Bootstrap, MySQL, and jQuery.

SKILLS

- Programming Languages** : HTML | CSS | JavaScript | PHP | TypeScript.js
- Frameworks & libraries** : React.js | Spring Boot | Node.js | Express.js | Laravel | Next.js
- Databases** : MYSQL | MongoDB | Firebase Firestore
- Tools** : Git | GitHub | Postman | Google Colab | Jupyter Notebook | XAMPP | Tomcat
- Methodologies**: Agile/Scrum | RESTful API Design | CI/CD Pipelines | Manual QA Testing
- Soft Skills** : Leadership | Problem Solving | Team Collaboration | Communication
- Languages**: English | Sinhala

CERTIFICATE & PARTICIPATION

- Completed the Web design for beginners course in CODL of University of Moratuwa
- Completed the web development & developer interview by ACE(LinkedIn learning)
- Completed the certificate courses SEO, CI/CD Pipelines, REST API, MERN (LinkedIn learning)
- Participated in “Quality Assurance” workshop conducted by Computer society of ICBT
